1 Instructions

Package Contents

Security Warning

- Please change the password of your camera regularly, and use the combination of numbers, letters and special characters.
- We recommend you to update your camera to the latest firmware every three months, in order to ensure the safety of your camera and have a better product experience.
- Please keep the username and password of your camera safe, and do not tell them to others.

2 Hardware Introduction

3 Download APP

To install the Foscam APP on your smartphone, you can choose either of the following methods:

■ Scan QR code

If you have a QR Code APP on your smartphone, scan the code below.

Foscam

■ Download from App store

You can search the term "Foscam" directly on the APP Store or Google Play Store. Then find the APP that appears with the same icon as shown above, and install it to your smartphone.

Before you continue, please note:

- Make sure your wireless router is enabled DHCP, and connected to internet.
- Make sure your smartphone is connected to your wireless router and located near the camera.

4 Wireless Connection

You can add the Foscam camera using a smartphone.

1. Connect the camera with power and wait for a moment, until the camera plays a sound "Hello, Foscam".
2. Make sure your smartphone is connected to your wireless router.
3. Run the Foscam APP on your smartphone, register a Foscam Cloud account then log in. After the camera plays the sound "Ready for WiFi configuration", please follow the steps below to add your camera.

Note:

If your device fails to connect to the Wi-Fi using the Setup Wizard, you can also use WPS mode connection. Please refer to the User Manual on the Foscam website at <http://www.foscam.com>.

5 Access the IP Camera

Once succeeding in connecting your camera, you can access it via three different ways (Foscam cloud website, APP on smartphone, Web UI).

■ Foscam Cloud Service

You can access the camera via Foscam cloud website: www.myfoscam.com.

You can enjoy good experience on this website as below.

- It's quite easy to remotely access and manage all your IP cameras.
- You can enjoy the latest feature firstly on the website, for example cloud storage, video sharing, etc.

If you have already registered an account on Foscam APP, you can directly use this account to log in.

■ Foscam APP

You can use Foscam APP to view the video on your camera anytime, anywhere.

Note:

You can experience new features, including EZLink, Online-Update, Message Push, etc., ONLY on "Foscam" APP. Any other third-party APP, other than "Foscam", can't support all these new features.

■ Web UI

If you want to manage your camera more professionally, we suggest you to access your camera via browser. You can download the "Equipment Search Tool" from <http://www.foscam.com> to your computer, then access the camera directly via the search tool.

6 Hardware Installation

1. Rotate the base of the camera until points a and b are aligned, this allows for the mounting plate to be removed.
2. Install the mounting plate on a wall or ceiling with supplied fixing screws.
3. Align points a and b to insert the camera base to the mounting plate. Rotate so that points a and b are no longer aligned, this attaches the camera securely to the base.

7 Important Notice

■ Camera Username / Password

The camera username / password are used to access and manage your camera on computer. They can improve the security of your camera significantly.

If you have forgotten either of them, you need to press and hold the "Reset" button on the camera powered on. After hearing the voice prompt, release the button. The camera will automatically reboot and the default settings will be restored. Then the default username / password become admin / (blank).

After restoring to the factory default settings, you need to delete the camera from Foscam APP, and then add it again.

■ Foscam cloud service Account / Password

Foscam cloud service account / password is used to access Foscam APP or Foscam cloud service website, you can register the account / password on one of them.

■ Storage Media

Support cloud storage, NVR(Network Video Recorder), SD card. If you hope to store the video for a whole day, it is suggested to use the Foscam NVR.

■ Firmware Upgrade

You can upgrade the firmware on Foscam APP with new feature "One-key Online Upgrade"(Enter Foscam APP, select "Settings > Firmware Upgrade").

You also can download the latest version to upgrade your camera from office website <http://www.foscam.com> (Access the website, select "Support > Firmware Downloads").

■ Safety Tips

- Please check whether the power supply is matched before using the camera.
- Please fix the camera and brackets with the locating screws to avoid falling down.
- To avoid the risk of fire or electric shock, please keep your camera in dry place, and do not let the camera be affected with damp.
- The camera is electronic equipment, please keep it away from children.
- Change your default port to a greater range to avoid hackers' invasion.
- Check the logs of your Foscam cameras often. Foscam Cameras have embedded logs reminding you which IP addresses are accessing the camera.

8 Technical Support

If you have any problems with your Foscam IP Camera, please contact the Foscam reseller you purchased from. If your problem still can't be solved, please send your e-mail to the technical support team of Foscam headquarter at tech@foscam.com.

Your valuable comments and suggestions on improving Foscam products are welcomed!
