Solutions

28 years SECURITY SOLUTIONS

WHO WE ARE

Sectron Ltd. was founded in 1990 as the first private company in the security market in Bulgaria and has maintained its reputation over the years as an innovative and highly technological market leader.

The company's main activities consist distribution and total engineering of security systems, including: alarm systems, CCTV, fire detection and fire extinguishing systems, access control, hotel security systems, systems for detection of water and gas, perimeter security, communication systems, integrated security systems, centralized security and data transmission systems, anti-theft systems for commercial premises, specialized bank security and warning systems, structured cabling systems, among others.

Today Sectron Ltd is an established and preferred partner for dealers, system integrators and installers of security systems for the territory of Bulgaria, Serbia, Macedonia, Albania and Montenegro. Our business is founded on the continuous strive to preserve and promote the position of total technology leader in the field by offering high-quality products, keeping our promises and providing excellent technical support and flawless service. That is why our systems meet the high demand of all customers – from home and office to the largest industrial, commercial and institutional facilities..

PROJECTS

In two years period (2011- 2013) SECTRON integrated security and safety systems- fire alarm, video surveillance, alarm systems and access control, people counting system, public address and parking system and structured cabling for the **Paradise center**-biggest shopping and entertainment complex on the Balkans.

The 105,000 sq. m commercial space is protected with:

- Over 3,700 Hochiki fire detectors. Over 150 networked fire alarm control panels Kentec.
- CCTV system with more than 400 cameras Panasonic
- Integrated Inner Range security and access control of the premises
- Public address system with over 2,000 speakers and sound projectors
- Centralized parking system for over 1700 cars

2015 – 2016 Sectron integrated security and safety systems in largest shopping center in Plovdiv- **Markovo Tepe**. The largest shopping center in Plovdiv:

- Integrated security system, IP video surveillance system, people counting system.
- Fire alarm system, gas detection system, public address and voice evacuation system
- Parking system with free spot visualization, License Plate Recognition(LPR) system
- SCS and CTV systems

2005-Till present,

Sectron, designed and integrated city video surveillance for the needs of Sofia. The Surveillance system covers the most important and heat points of the city. Main features of the system:

- Traffic control at the central city zone
- Red light violation recording
- Prevention of thefts
- Prevention and video footage of vandal and antisocial activities

City video surveillance system in Sofia has

- More than 360 video surveillance cameras
- Over 60 LPR cameras
- 24h monitoring center for surveillance and prevention of criminal activities and active communication with patrol troops.

In 2008 started integration of Centralised video surveillance systems in schools and kindergartens in Sofia.

In 2012 this project was expanded with additional social sites, parks and other public places.

With this project Sofia municipality has covered:

- 203 schools, kindergartens and social sites with more than 1880 cameras
- 9 parks and Sofia subway with more than 120 cameras

2012-2014

Sectron built advanced IP video surveillance system in Chelopech.

The system, based on Panasonic™ IP cameras located in key places of public importance and entry and exit points of the city, secure the perimeter of schools, kindergartens, sports complexes and hospitals in the municipality.

The main features of the Chelopech system:

- Traffic control at the city
- Prevents thefts and assure rapid intervention of the police authorities
- Prevention and video footage of antisocial activities

The project was further extended with another 90 IP cameras.

2009-2017 **Security systems in prisons and arrest facilities in Bulgaria.**

Project involves 11 prison and 28 arrest facilities in Bulgaria. Systems were designed and built according to the specific requirements and characteristics of each place. Every prison and detention facility is equipped with modern video surveillance system that monitors the actions of detainees.

At prison facilities advanced perimeter protection systems combining digital infrared, microwave barriers and physical fencing of barbed wire were installed in addition to the video surveillance. Those systems improved the security of these facilities.

2017 **Centralised system for video and audio recording in the patrol cars of Traffic Police in Bulgaria.**

More than 300 patrol cars are equipped with:

- 3 pcs. high resolution cameras
- Specialised wireless wide range microphones
- Specialised video recorder for vehicles with integrated GPS module providing 24/7 monitoring and registration of the actions of the inspectors and the inspected party
- Lightbar with high density light in blue color
- Specialized amplifier and siren

2017 **National Bibliothec „St. St. Kiril and Metodi”**

Sectron, designed and integrated fire alarm system for the needs of the Bibliothec which involves:

- Addressable fire alarm central NSC with 14 circles.
- The total amount of wire and wireless Hochiki devices implied are over 1000 from which over 100 wireless detectors FireWave.

Sectron delivered in 2017 for the security needs of **EU presidency** taking place in National Palace of Culture as a main building - video surveillance, fire alarm and signaling system

- The CCTV system consists of over 460 FullHD IP cameras on HIKVISION
- The fire detection system combines over 1500 addressable detectors and BOSCH modules
- The alarm system consists of over 200 BOSCH detectors

2017 Video surveillance system for Border checkpoints

Sectron delivered and integrate central monitoring component and intelligent video surveillance systems at Kapitan Andreevo and Kalotina border checkpoints.

- Systems provide protection of the perimeter and control of the vehicles passing through the border checkpoint.
- The total number of IP cameras installed on the site is over 460 units, of which over 20 pcs. HIKVISION cameras high resolution over 6 megapixels, 320 pcs. FullHD IP cameras HIKVISION and over 100 ARH number recognition cameras.
- The CCTV system is based on Milestone Corporate. Server configurations and communication equipment are CISCO's. The central component that performs analytical functions in the system is based on Microsoft's Domain Awareness System. This project was realized by a consortium between SECTRON Ltd. and TELELINK EAD

2015 Sectron integrated security systems in the new building of **Unicredit Bulbank Global Banking Services** Division.

The new attractive building is secured by:

- Access control with designer's turnstiles for the main entrance and office premises
- Intruder alarm system for the offices and for the perimeter of the building
- Hikvision video surveillance system covers office part, perimeter and the common parts of the building

2014-2015 Sectron integrated IP video surveillance systems for the needs of **Raiffeisen Bank Bulgaria** .

The renovated IP video system for the Austrian bank :

- Covers more then 120 branches in Bulgaria
- Combines over 750 Full HD and 3Mpx Smart IPC cameras
- All cameras are monitored 24/7 in the bank monitoring center
