- **SMILE** New generation video doorphone monitors from **Fermax**
- New version of **BabyWare**

In this edition:

- New products
- Software updates
- Promo offers

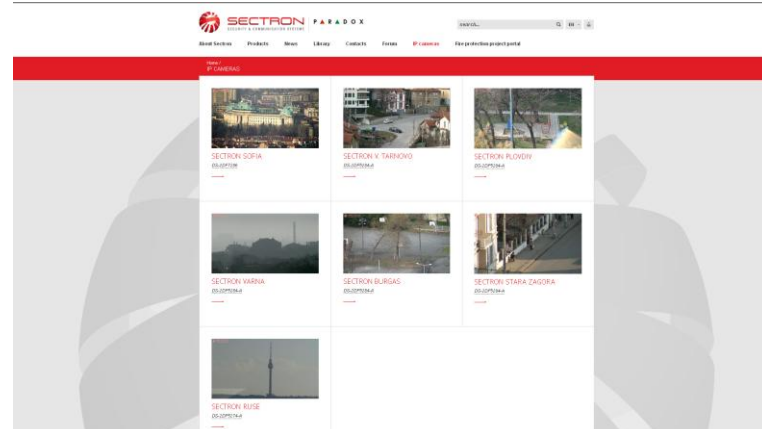

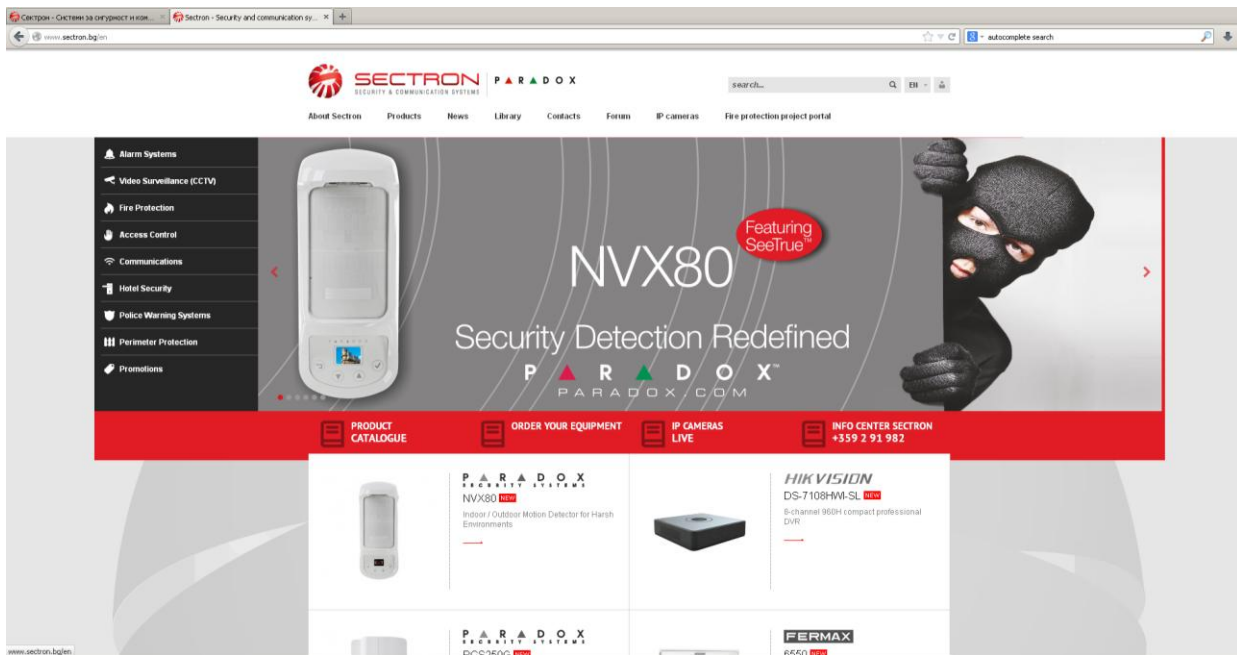

Launch of Sectron's new website

Sectron invite security professionals to explore its new website. The new website has been designed to provide the ultimate user-friendly experience with improved navigation and functionality throughout, allowing customers to access detailed product information with the option to share information across all major social networking sites.

The site includes extensive product information to help customers understand Sectron's complete range of security solutions. Technical data, brochures and software work together to provide a detailed overview of Sectron's capabilities across a wide range of sectors.

Created with the user experience firmly in mind, the website has been designed using the latest technology so the site is compatible with today's browsers and mobile devices.

The new website means that customers can now benefit from richer online content that is easier to navigate and share with others, assisting the specification process.

Live video from the newest cams, Sectron offers, can be seen in the "Live IP cameras" section.

In this section of the website video surveillance cameras installed at different locations in Bulgaria demonstrate the latest IP technologies.

The Forum section is open 24/7 for your questions, opinions and comments on products and solutions Sectron offers.

SkimProt Protection for your bank card

Since the beginning of December 2013., SECTRON offers its customers a special solution for protection of bank cards – SkimProt.

SkimProt protects your bank card from unauthorized copying of valuable personal and bank information and draining of your bank account. SkimProt is specially designed sticker, easy to attach on the bank card magnetic strip, protecting it from the scanning by so called skimming devices*. Designed for use with bank cards equipped electronic smart chip and magnetic stripe it blocks the access to card magnetic stripe.

SkimProt fully protects information written on the magnetic stripe while service code directs ATM's and POS terminals to seek bank details on the card smart-chip. Since the recorded information is duplicated on the smart-chip, the card is fully operational while remaining invisible to the skimming devices.

SkimProt offers you high level of protection from draining your bank account at an attractive price.

You can find it in all SECTRON offices around Bulgaria!

FOSCAM budget solutions for home video surveillance

FOSCAM is one of the leading CCTV IP cameras manufacturers in the world, as suitable for end user as for use in security surveillance of small commercial/ production sites.

All FOSCAM cameras are equipped with IR and deliver good quality of the image in all light conditions. In addition the two way audio give you the option to listen everything that happen in the surveyed site.

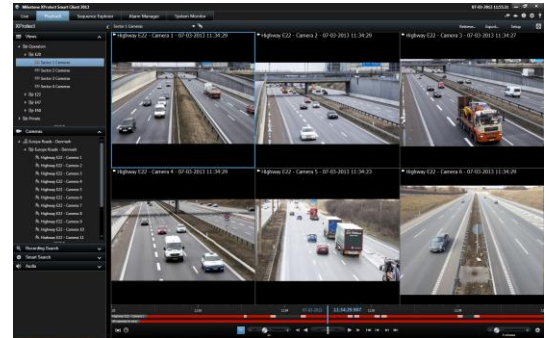

- With wireless connection on board you can connect the FOSCAM cameras directly to your home 802.11b/g/n wi-fi network. The free DDNS service delivered with the cam from FOSCAM save you concerns for providing a static IP address only for the camera.
- Remote alarm to Email/FTP when motion is detected in combination with the mobile applications for smartphone and tablet(Apple iOS/Android/JAVA) or web browser preview(IE/Chrome/Firefox) give you the convenience to view timely, what happens home or office even when you are on the road.
- With the free CMS software you can record and monitor up to 16 cameras on your home PC.

All FOSCAM products can be seen [here](#) or in the Sectron's offices around the country.

Milestone XProtect LPR –system for automatic detection and recording of license plates

XProtect LPR is additional software module to Milestone XProtect, which provide automatic detection, recognition and record in text file of car licence plates. In addition this module can logically connect the recognised licence plates with the recorded video wich give you the opportunity to search in the video archive for specific licence plate. The system provides reliable and accurate recognition of registration plates from different nationalities and in combination with a suitable megapixel IP camera is a powerful tool for traffic monitoring, management of access to restricted areas or optimizing operations. An example of this software is the ability to sound an alarm message on detection of predefined list of number plates, allowing automated response - such as opening a gate or portal. Control and setup of the system are fully integrated and work in the main Milestone XProtect software interface. Recognized plates are displayed in real time in the standard client module XProtect Smart Client in list form. When choosing a number from the list automatically switches to Playback, the video showing the crossing of the vehicles. There are separate search box number, camera, country, time period, which makes it quick and easy identification of a vehicle and the time of its passage.

Detection of origin	XProtect LPR has a large set of libraries with the number of different countries. The software can recognize license plates from various countries.
Automation of processes	Identification numbers from predefined list can trigger an automatic response – activation of the alarm output, opening the gate, garage door, gates and more.
Parking management	You can replace the traditional ID cards / tickets / RFID tags with XProtect LPR. The software detects the number of the vehicle and automatically access to the official parking only your pre-entered in the list of cars.
Search for cars	Xprotect can sound an alarm upon detection of the number of wanted vehicles from predefined list, allowing quick response in real time to the relevant authorities.
Theft prevention	The software can prevent theft as fuel station gas pump automatically disconnects Detection number of vehicle fuel is not paid in previous cases.
Traffic optimization	With Xprotect LPR can analyze travel time of a vehicle in an urban environment, and thus to find "close" locations and optimize the organization of the movement.

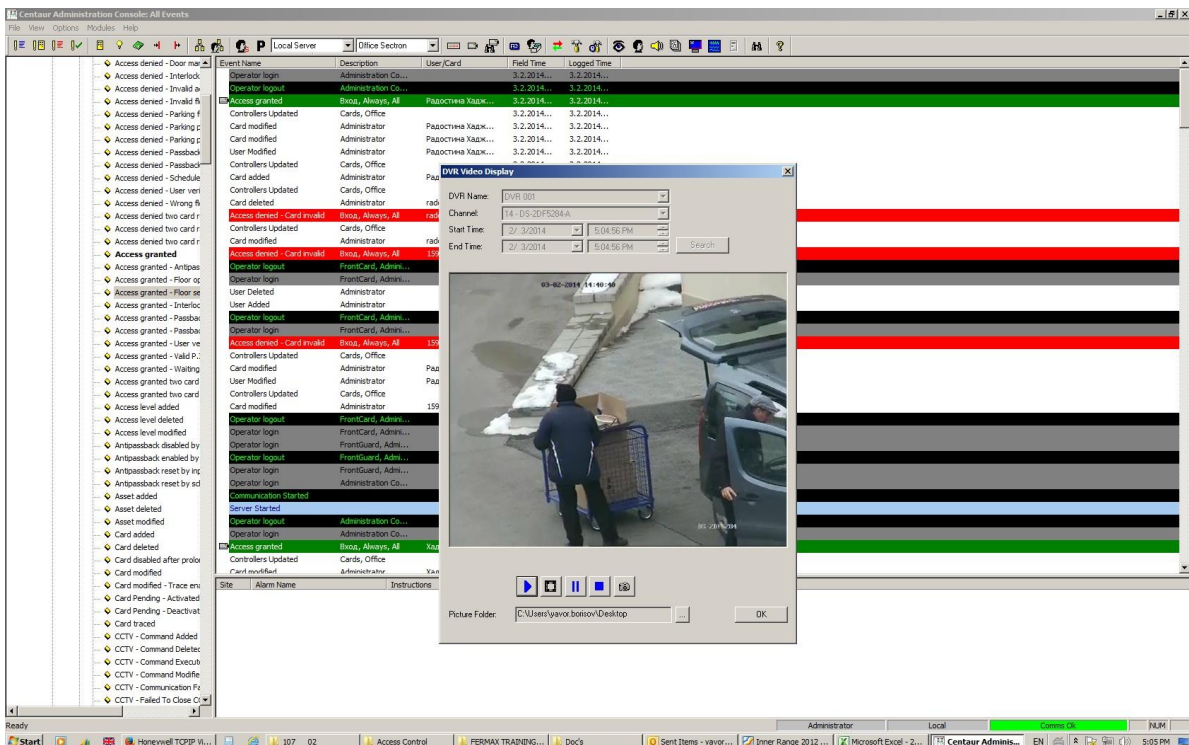

Milestone XProtect LPR is add-on and it is necessary to have installed one of the following platforms: XProtect®5 Corporate, XProtect® Enterprise 8.1, XProtect® Professional 8.1, XProtect® Express 1.1 and XProtect® NVR 2.

C-SD05VL Miniature vandal proof camera with IR illumination

Very often in practice client wants the camera to be "invisible", to have a higher quality of picture, to see well in the dark, etc. SECTRON offers miniature Vandal-proof camera with metal casing, IR illumination up to 10 meters and a high resolution of 650 TV lines (960H CCD) produced by CBC. Extremely compact design with dimensions 55x37x55 mm (WxHxD) allows you to install a mini camera in all situations.

Integration of Hikvision video surveillance solutions in CDVI access control system Centaur

Newest version of CDVI Centaur management software for access control systems has integrate latest CCTV systems Hikvision. The software integrate all digital video recorders (DVR) from DS-71xx-xx, DS-72xx-xx, DS-73xx-xx series, hybrid and network video recorders branded Hikvision.

Upon the occurrence of an event, predefined by the user, Centaur will display video (live or recorded) directly from the Hikvision recorders connected to the system.

Through the integration of the two systems – you get easy and convenient interface to monitor what is happening in the protected site through one interface.

The new version can be downloaded from [here](#).

New Products
